

VAISHNAVI SHIMPI

Python Full Stack Developer | AI/ML Engineer

Pune, Maharashtra, India | +91 9322292520 | vaishnavishimpi1@gmail.com

<https://www.linkedin.com/in/vaishnavi-shimpi-9a5307270/> | github.com/vaishnavishimpi-28

PROFESSIONAL SUMMARY

Results-driven Python Full Stack Developer and AI/ML Engineer with hands-on experience building scalable web applications and AI-powered automation systems using Django, React.js, Python, and Machine Learning frameworks. Experienced in REST API development, RAG systems, LangChain, NLP, OCR-based data extraction, and cloud deployment. Skilled in delivering end-to-end solutions with strong problem-solving abilities, responsive UI development, and AI-driven workflow automation.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Frontend: React.js, HTML, CSS, Bootstrap

Backend: Django, Django REST Framework, REST APIs

AI / ML: Scikit-learn, TensorFlow, Hugging Face Transformers, NLP, LangChain, RAG Systems, Agentic AI, Prompt Engineering, OCR & AI Automation

Databases: MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Jupyter Notebook, Streamlit

Cloud & DevOps: Basic DevOps, Cloud Deployment

PROFESSIONAL EXPERIENCE

Full Stack AI/ML Developer

MEPSTRA Engineering Solutions Pvt Ltd, Hyderabad | May 2025 – Present

- Developed and maintained scalable full-stack web applications using Django, Python, and React.js.
- Built and integrated RESTful APIs with React-based frontend systems, reducing average API response time through optimized query handling.
- Designed responsive, accessible UI components using HTML, CSS, JavaScript, and Bootstrap across multiple device breakpoints.
- Developed an AI-powered data extraction application using Gemini models with Streamlit-based visualization.
- Implemented machine learning-driven automation for intelligent data extraction, reducing manual effort by approximately 60–70%.
- Applied prompt engineering and structured output handling to extract reliable data from unstructured diagram inputs using LangChain and OCR pipelines.
- Used Git for version control; contributed to cloud deployment workflows on production environments.

KEY PROJECTS

Electrical Data Extraction Tool (2025)

Tech Stack: Python, Gemini API, LangChain, OCR, Streamlit, Excel Automation

- Built a complete AI-driven extraction pipeline using OCR, Gemini models, and LangChain to convert unstructured electrical diagrams into structured Excel sheets.
- Automated extraction of 100+ electrical symbols, labels, and dimensions per diagram — reducing manual data entry time by ~70%.
- Implemented structured Excel export functionality improving reporting accuracy and downstream workflow efficiency.

- Developed intelligent parsing and data-mapping logic capable of handling varied and non-standard diagram formats.

Job Portal Web Application (2024)

Tech Stack: Django, React.js, HTML, CSS, Bootstrap, JavaScript, MySQL

- Developed a full-featured job portal platform with Employee, Employer, and Admin modules serving end-to-end hiring workflows.
- Built Employee Module with profile creation, job search, and application tracking; Employer Module with job posting, resume management, and candidate tracking.
- Created Admin Dashboard for platform-wide user management and monitoring with role-based access.
- Integrated Django REST APIs with MySQL backend; achieved responsive cross-browser, cross-device compatibility.

EDUCATION

Bachelor of Engineering – Information Technology

Dhole Patil College of Engineering, Savitribai Phule Pune University | 2020 – 2024

CGPA: 6.91 | 60.65%

HSC: Savitribai Phule Pune University, 2020 | 68.62%

SSC: Nasik Board, 2018 | 89.40%

CERTIFICATIONS

- Python Full Stack Developer Certification (2024)
- Data Science & Machine Learning Certification (May 2026)

ACHIEVEMENTS & ACTIVITIES

- Lead Actor – Bharat Karandak One-Act Play Competition (2024)
- Kabaddi Team Member – Intercollege Tournament (2023)
